ACADEMIC THEME

Children are naturally curious about their world and enjoy exploring their surroundings. Because of their inquiring minds, children are eager to know why things are the way they are and will ask many questions about their immediate environment. This month, we focus on the nature, teaching our little ones about parts of the amazing earth that we live in, developing an appreciation for it and a desire to protect it.

MEET THOSE WHO MAKE THE MAGIC HAPPEN AT SUNSHINE HOUSE

Written by Ching Balo

Meet the most popular teacher at Sunshine House International Kindergarten – Teacher Gary! This year, Teacher Gary was in charge of MATH, Art and PE! No matter which subject T. Gary is assigned to teach for the school year, our children always equate learning with him fun and exciting!

Teacher Gary has been with SHIK for almost 4 and a half years and he has been homeroom teacher for KG International since. He is whom everyone turns to when it comes talking about crawling creatures ... spiders, caterpillars, worms, snails – so he is really the cool teacher who can touch these tiny creatures without feeling squeamish and also the best person to teach the children to care them and not to harm them.

T. Gary holds a Bachelor's degree with honors in Marine Science from the University of Ulster and a Post Graduate Certificate in Social Justice and Community Action. He also completed a Certificate in Early Learning Teaching Methodologies, a TEFL (Teaching English as a Foreign Language) and an Autism Certificate to boot!

When you see your child being more than curious about little creatures in the garden and them being gentle with it – then we can blame T. Gary for that!
